Attention: Sales Manager

Dear Sir:

A mutual customer of ours, with whom we have done business for many years, has suggested that we contact you.

We here have been supplying a northern Kentucky plant with a variety of solvents for some years. In the intervening time they have stored these spent solvents in 55-gallon drums. It is here where we believe our two organizations might have a common meeting ground. We were given to understand that you have the capacity of moving drums such as these, which in this case contain mostly toluene, and either utilizing the spent product therein or upgrading it yourselves. We have available approximately 600 to 900 drums which we would like to move in your direction and, of course, there is a distinct possibility that a back resupply of prime product might be arranged.

If you indeed are capable of handling these small spent solvent streams, we would very much appreciate hearing from you. We await the benefit of your response.

Very truly yours,

INDUSTRIAL SOLVENTS CORPORATION

C. C. Siegele

December 8, 1971

Obitts Chemical Company
142 Locust Street
P. O. Box 375
Elyria, Ohio 44035

Attention: Mr. Obitts

Dear Mr. Obitts:

Confirming recent telephone conversation relative to our letter of December 2, 1971 to your attention, two of the large waste products are 60,000 plus gallons of toluene and 20,000 plus gallons of benzene. The solvents are contaminated with tars, water and, in some cases, low boilers such as ethanol and ethyl ethyr. Smaller drum quantities of heptane and chloroform are also available, however are contaminated with organic reactants in smaller quantities. There are also available over a year's period approximately 100,000 gallons of methanol water. A good portion of the drums are relatively new and should have some kind of intrinsic value. However, a compartmented tank wagon or tank car could also be used to bulk load some of the drum product if that proved to be more advantageous.

I did err in indicating a northern Kentucky plant. This particular plant with the drum inventory is located in Newport, Tennessee and not Newport, Kentucky as I originally indicated.

Mr. Obitts
Obitts Chemical Company

December 8, 1971
Page 2

Based on the above information, and realizing that probably on a drum to drum basis no such thing as a representative drum is available, do you still want to examine a 1-gallon sample or perhaps shall we figure out an approach wherein 40 or 50 drums could be picked up via your dray truck and delivered to your plant?

Would appreciate the benefit of your thinking.

Very truly yours,

INDUSTRIAL SOLVENTS CORPORATION

Cleveland Section, A.I.Ch.E.

Cleveland, Ohio

Reply to:

Mr. Reagan Houston
146 Curtis Drive
Avon Lake, Ohio 44012

November 7, 1973

Dear Sir:

Many small manufacturers do not understand the recent pollution laws which Ohio now has. As engineers, our committee is volunteering to help companies with less than 50 employees who desire assistance. Would a day of confidential discussion with someone who has a general knowledge of the laws plus a background in chemical engineering help you to know what type equipment salesman to call, what process changes to consider, or what type consultant to hire? Perhaps things are under control and you just want an informal check.

Our volunteers are members of the Cleveland Section of the American Institute of Chemical Engineers who would donate free up to one day of their time per company. Eligible companies should have no more than 50 employees, including those at other locations. The program is in cooperation with the Northeast District of the Ohio Environmental Protection Agency (Cuyahoga Falls) who gave us your name and address.

The Cleveland Section covers seven counties in Ohio. The program is just beginning and we are initially testing the need and effectiveness of this approach with a few companies in Lorain County. We would not, of course, recommend specific equipment suppliers or consultants.

If you wish help, please write to us. We will phone you for further information and to arrange a possible meeting at your plant.

Very truly yours,

Environmental Control Committee
Reagan Houston, Chairman

May 3, 1973

Dear Friends:

Plans for the Seventh Annual Advisory Council Banquet to be held May 16th at the Holiday Inn are being finalized. Again it has been specifically scheduled during observance of National Police Week.

Because of the significant contribution made by members of the Advisory Council in effecting the passage of the new county jail levy last year, we have obtained Mr. Norman A. Carlson, Director of the Federal Bureau of Prisons, Washington, D. C., as our speaker. He will be introduced by Mr. Bennett J. Cooper, Director of the Ohio Department of Rehabilitation and Corrections. Several persons of national and state prominence will be in attendance as guests.

Cocktails will be served from 6:00 PM until 7:15 PM with dinner to follow. You are welcome to invite guests at a charge of \$10.00 a person.

Your reservation card will be mailed next week. Will you return it promptly?

Sincerely,

Dan

April 15, 1973

Obitts Chemical Co.
Elyria, Ohio 44035

Dear Sir:

I would appreciate it if you would please send me an application. I am looking for a position as a laboratory technician.

My education includes a high school diploma from Elyria High School in 1970 and a two-year training program at Lorain County Community College. I have had courses in chemical calculations, economics, organic chemistry, qualitative chemistry, electro-chemistry, instrumental methods quantitative analysis, industrial analysis, polymer chemistry, metallurgy, English, and math. Mr. Charles Hoffine and Mr. David Schmitikons, Associate Professors at Lorain County Community College, will be very glad to give you information about my college work.

I was twenty-one years old this past December. During my two years at Lorain County Community College, I did not miss a day because of illness. While I am without actual experience in the chemical world, I have every reason to believe that my chemical training at Lorain County Community College, natural adaptability, and willingness to learn will make good that deficiency.

Will you tell me, please, when it would be convenient for me to call at your office for a personal interview? You can reach me at my home telephone, 277-4303.

Sincerely yours,

Judith Shinski

Director of Purchasing:

Dear Sir:

Let me introduce you to a new product.

DIAS MINI PUMP

The pump was originally developed to add DIAS HUMIDIFIER CLEANER to humidifiers to keep them free of lime deposits. Which it does excellently.

But, an interesting thing happened. As we began to show the pump to people from other types of industry, they found many other applications. The uses for this pump seem to be endless.

The price of this pump makes it possible to automate many processes that would normally cost hundreds of dollars more.

The flier shows the pump attached to a half-gallon plastic bottle, however, it can easily be attached to any size container.

We manufacture two similar, but different pumps. The Model "S" pump can be disassembled to change the tubing and/or motor for different pumping capacities.

Please read the data and specification sheet to see a partial list of uses. I believe you will see from the various applications that a need probably exists in your operation for this pump. It could save your company many dollars.

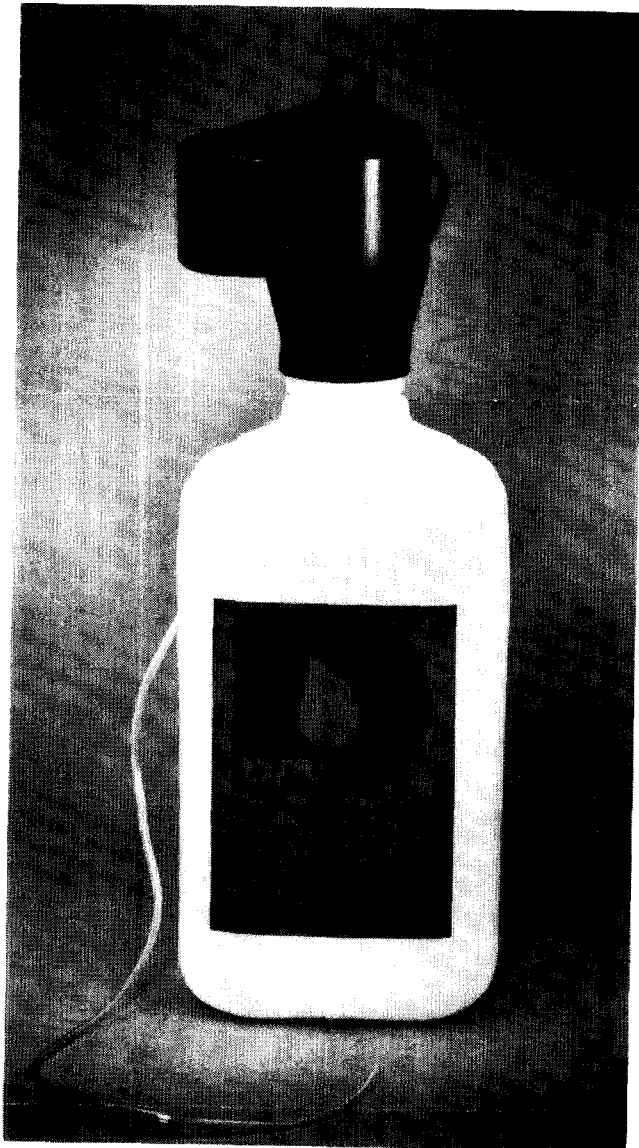

An uncomplicated, low cost pump that is extremely accurate.

Let us show you how it can make money for you.

Sincerely,

C A Thomas
General Manager

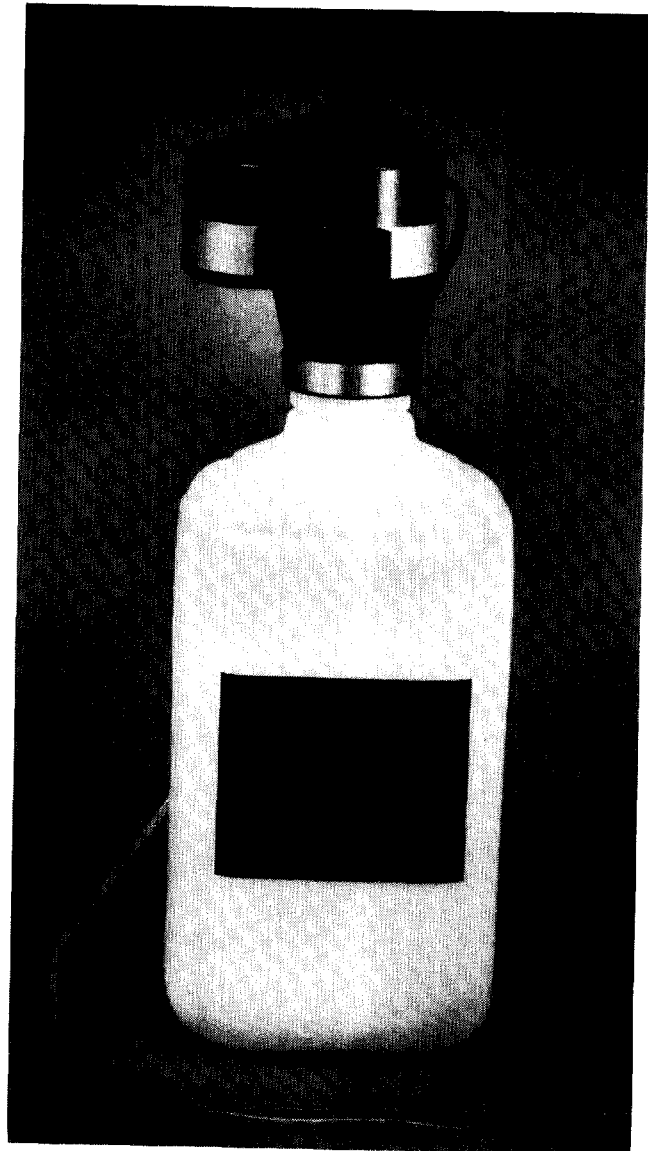

DIAS MINI PUMP

REGULAR PUMP

\$14.95

FOB Shipping Point

MODEL S

\$25.00

FOB Shipping Point

The pump with a thousand applications at a small cost.
Every home, industrial plant or commercial building has a need
for this pump.

Now you can automate processes that would normally cost
hundreds of dollars more.

APPLICATIONS

CHEMICAL:

humidifiers
swimming pools
cooling towers
boilers
compactors
steam tables
well water
water softeners
plating tanks
soap dispensers
air washers
dust collectors

WATER:

house plants
Christmas trees
fish tanks

OIL:

conveyors
machinery
cutting oil

LABORATORIES

HOSPITALS

SPECIFICATIONS

Pump capacities*	4.5 ml/hour to 172.0 ml/hour
Electrical	24V or 110V, 60 cycle
Plastic Tubing	Polyvinyl chloride

*Conversion factor = 29.6 ml/ounce

Pumps are available on special order with capacities down to .0027 ml/hour.

To change capacities of Model S pumps, a motor-tubing package can be ordered at \$9.50.

Mr. R. W. Obitts
Obitts Chemical Company
Post Office Box 375
Elyria, Ohio 44035

Dear Mr. Obitts,

It was indeed a pleasure to visit with you by phone on Friday the first.

As you know, we are in the waste oil recycling business here in Sharptown, Maryland. We can recycle waste oils into a number five fuel oil having a sulphur content of about one quarter of one percent, well within federal air quality standards.

We have been planning for some while now to get involved in the solvents reclaiming business in western Pennsylvania (Pittsburg area) and Ohio.

One of the possibilities is that we might be interested in purchasing a going business somewhere in that area. We are open to any proposals along that line that might have possibilities.

Actually we have been in this associated enterprise for sixteen years, and we are still learning something new daily about it. The surface has been barely scratched in the elimination of pollution from waste oils and associated lubricants as well as solvents.

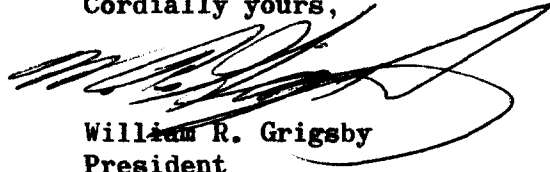

Should you have any observations on the various possibilities that might be to our mutual advantage, we would

SPECIALISTS IN THE REMOVAL, TRANSPORTING AND RECYCLING OF WASTE OILS

933-6157

appreciate knowing them. Also, if you have any information for us that might be helpful in organizing a solvents reclaiming business, we would be most grateful to you for it.

Cordially yours,

A handwritten signature in black ink, appearing to read 'W. R. Grigsby', with a large, sweeping flourish extending from the end of the signature.

William R. Grigsby
President

Att: Mr. Obitts

Dear Mr. Obitts:

We have two products of possible interest to your firm. The first is our Methanol DV-1. This is available in quantities up to 15,000 gallons per month on a continuing basis. Delivery can be via tank truck as well as tank car.

Typical analysis shows the following:

Methanol	95% minimum	
Tetra hydrofuran		1.3% maximum
1-4 Butanediol		1.0
Water		1.0
Ethanol		1.0
Acid number	neutral	
totally water soluble		

The second product is our Diethylene Glycol PO-1. This is available in substantial quantities on a continuing basis. Delivery would be via tank car only.

Typical analysis shows the following:

Diethylene Glycol	95% minimum
TEG and higher	balance
color	prime white

Sample of both these products are available upon request. We believe that attractive pricing can be worked out if these products are found suitable for use in your operation.

Very truly yours,

TO ALL MEMBERS OF THE ADVISORY COUNCIL ON SHERIFF AFFAIRS

When 250 leading citizens of Lorain County banded together on May 11, 1967 and signed the Charter of the Advisory Council on Sheriff Affairs, they adopted a statement of purposes, parts of which are quoted as follows:

"To lend support to approved programs for better methods for suppression of crime and its control.

"To provide financial assistance, when it is otherwise unavailable,for public relations material."

At the last annual meeting of the Council it was unanimously voted to assume responsibility for passage of a .1 mill levy this November to construct a new County Jail.

We are already deeply involved in this effort, but we find that promotion material and advertising costs money.

I have, therefore, authorized a ten dollar assessment on all Council members to support the new jail promotion drive; and you are here-with billed in that amount.

Please forward your check immediately in the enclosed envelope.

Respectfully,

William E. Foster

May 20, 1972

Dear Sirs:

I shall be graduating from Lorain County Community College with an Associate Degree in Applied Science in Chemical Technology on June 15, 1972. Please consider me as an applicant for any present or future openings which you may have for the position of lab technician. Although I am primarily interested in a position as a lab technician, I would consider taking a job that would be closely related to this field of work or would eventually lead to a position of lab technician. Below is a resume of my qualifications:

EDUCATION: Graduate of Admiral King High School-- Honors Course, Class of 1970; Graduate of Lorain County Community College, Chemical Technology, Class of 1972.

EXPERIENCE: Although I have no actual experience in the chemical world, I feel that my chemical training at Lorain County Community College was both thorough and exact. I know that this training coupled with my willingness to learn will overcome my lack of experience.

REFERENCES: Mr. David Schmitkons, Associate Professor, Lorain County Community College; Mr. Charles Hoffhine, Associate Professor, Lorain County Community College.

I am twenty years old and in the best of health. I am sure that my college training will enable me to do thoroughly satisfactory work for you.

I would like to have an interview sometime in the near future when it is convenient for you. You may contact me at my place of residence: 318 West Avenue, Elyria--TelephoneNo: 322-9359.

Thank you in advance for your consideration.

Sincerely yours,

Linda Zuba

Vanguard Paints and Finishes, Inc.
Marietta, Ohio 45750

Dear Mr. Mildren,

In reply to your letter of April 17, 1972, we will pick up your dirty material, in bulk, no less than 5,000 gallons at a time. We will deliver your clean material at \$8.25 per gallon, based on reclaimed gallons returned to you. This material will be dry, water white, etc.

Thank you for your inquiry.

Very truly yours,
Obitta Chemical Company

R. W. Obitta,

Gentlemen:

We have in our plant 72 drums of dirty solvents that we would like to dispose of.

The above drums contain a mixture of Toluene, Xylene, Alcohols, Esters and Ketone which have been used for cleaning purposes around our plant.

If you have any interest in the above material please contact the writer.

Yours truly,

Vanguard Paints & Finishes

J. E. Mildren

TRACE CORPORATION

ENVIRONMENTAL CONTROL DIVISION

199 North Leavitt Road

Amherst, Ohio 44001

(216) 988-4454

Gentlemen:

The TRACE CORPORATION, being devoted to Industries needs for clean air and reclaimable by-products, stands ready to offer complete services in the design, fabrication and installation of efficient air moving systems for improving your plant costs and environment.

Our personnel are proficient in all phases of make-up air and exhaust systems, including material collection and dust/fume/sound abatement systems meeting local, State and Federal codes.

Should your firm have an existing environmental problem, or would you be planning equipment rearrangements or new installations, we respectfully request that consideration be given our gratis consultant services.

We will be pleased to have one of our Sales Engineers call on you and discuss your needs or plans.

Kindly contact at your convenience.

Very truly yours,

R.V.MYERS
Executive Vice-President
